

# Goddard Donates Awards To Penn State

UNIVERSITY PARK (Centre Co.) — Dr. Maurice K. Goddard, Penn State professor emeritus of forestry and one of the pioneers of environmental policy making in Pennsylvania, has donated many of his most prestigious awards and honors to Penn State's School of Forest Resources.

The awards are on display in a cabinet made of Pennsylvania hardwoods and housed in Ferguson Building on the University Park campus.

"We are delighted to receive and display these awards," said Dr. Alfred D. Sullivan, director of the School of Forest Resources. "It's a perfect way to acknowledge Dr. Goddard's achievements and his dedication to both Pennsylvania and Penn State and it helps our students to appreciate the man and his association with our school."

Goddard made invaluable contributions to Pennsylvania's forests and parks both as a Penn State

faculty member from 1935 to 1955, and as Secretary of the Department of Environmental Resources—formerly the Department of Forests and Waters — from 1955 to 1979. He played a key role in making Pennsylvania's state park system one of the best in the nation, fulfilling his promise to locate a state park within 25 miles of every citizen of the commonwealth.

As a result of his efforts, he has been honored with awards ranging from the Society of American Foresters Gifford Pinchot Award — named after the former Pennsylvania governor and pioneering forester — to the first National Governor's Conference Outstanding Public Service Award.

"The School of Forest Resources has been a vital part of my life since 1935, and donating these awards is a way to show my appreciation," Goddard said. "It's also a way to extend my appreciation to the people who made the endowed professorship in my name possible."

The Maurice K. Goddard Chair in Forestry and Conservation — Penn State's second endowed chair — was established in 1984 to perpetuate Goddard's philosophy of conservation as an ethic and a way of life. Dr. Arthur A. Davis was the first Goddard professor of forestry. When he left to head DER in 1987, Dr. Benjamin A. Jayne assumed the professorship.

## 18-Foot Alternative For Rotary Cutter

GRAND ISLAND, Neb. — Servis-Rhino has again expanded its lead with the addition of the

SR18 flex wing rotary cutter.

The new SR18 fills the gap between the company, 15' and 20'

flex wing units and offers customers an 18' alternative to meet their mowing and shredding needs.

Some of the options available on the SR18 include hydraulic level lift axles, shredder attachment, front gauge wheel kit, and a baffle kit to further aid in crop residue shredding. With these options, the SR18 should be especially attractive to ridge-till farming customers. Not only will they be able to manage their crop residue, but they can also handle the tougher mowing jobs.

## New Agronomy Guide Now Available

UNIVERSITY PARK (Centre Co.) — If you need advice before planning, fertilizing, spraying or harvesting your crops, consult the newly released 1991-1992 Penn State Agronomy Guide.

The expanded 165-page publication contains sections on corn, grain sorghum, soybeans for grain, small grains and forages. Included for each crop is information on varieties, nutritional requirements, pest control and harvesting.

"There are new sections in the guide on integrated pest management, problem weeds, soil erosion and conservation plantings," says

professor of agronomy and guide coordinator Elwood Hatley.

Among the nearly 20 people who worked on the guide were extension agents and faculty from the departments of agronomy, entomology, plant pathology, agricultural engineering and agricultural economics and rural sociology. Government agencies, businesses and producers also contributed expertise.

The guide is available for \$6 from county extension offices or from the Publication Distribution Center, 112 Agricultural Administration Building, University Park, PA 16802 (phone 814-865-6713).
