METATRON

Better Management Today Means Higher Profit Tomorrow With the Westfalia Metatron Milk Meter

Metatron Milk Meter

Metatron Control

METATRON PROVIDES A MANAGEMENT LINK
Westfalia's Metatron gives you the edge in effective, economical herd management. This DHIA and USDA approved cowside milk meter provides milk metering on an individual cow milking for in-parlor evaluation. Vital information of milk produced, maximum milk flow, average milk flow and milking time is also available at cowside. Aids you to better manage each individual cow.

AUTOMATIC CLUSTER REMOVAL

Automatic cluster removal is another built-in feature of Westfalia's Metatron. Dependable and durable, the Metatron performs with accuracy and precision when removing the cluster from the cow's udder. The Metatron Milk Meter is transparent for visible operation and designed to take years of use. The unrestricted, full 1" milk outlet takes into account all air flow and milk flow requirements for high producing dairy cows of today and tomorrow. It's convenient, too, and can be on line mounted, or remotely mounted out of the operator's way.
