

While our ads may not be in color our Hybrids will keep you in green.

The farmers we know pay a lot more attention to gutsy, bin-filling yields than they do to glitzy, four-color ads.

So do we.

At NC+ we put our money where it does you the most good — researching, testing and delivering hybrids you can count on year after year. Numbers like:

4616

- A premier hybrid for top yields in this maturity.
- Very attractive plants with long, slender, deep-kerneled ears.
- Good standability, root strength and disease tolerance.
- Excellent companion for NC+ 3813 and NC+ 4275.

5891

- Standout performance under stress or ideal conditions.
- Healthy, medium-tall plants with superior root strength.
- Ears "flex" in response to population density.
- High quality grain is approved by many food processors.

America's
down to earth
seed company

We could do fancier ads. But the best way to see something great in living color is to call your NC+ Dealer. He knows just what you're looking for.
