**NEW & OLD  
TRENDS & FRIENDS**

**John Deere Day 1991**

AJKA

You are invited to attend our 1991 John Deere Day celebration, saluting old friends and new trends. In the John Deere Day tradition, we've planned something for everyone, including informative and entertaining films, time to visit with your neighbors, and delicious down-home food. You'll also have an opportunity to take a look at what's new at John Deere.

We know you have a busy schedule, but John Deere Day 1991 promises to be an occasion your whole family

can enjoy. So please plan to join us for a memorable John Deere Day. We'll be getting started around 9:30 am, January 17, 1991. Hope to see you there!

Sign up for our **Winter Service 10% Discount until February 28th.**  
Ask about our **Service Clinics -- Corn Planter Clinic: January 23rd**  
**-- Bobcat Clinic: January 29th -- Hay & Forage Clinic: February 5th.**

**OSWALT MODEL 333 RuffageMaster  
Ensilimixer**

by J-STAR

**EXTRA HEAVY DUTY — Designed to process those High Ruffage Materials — including Baled Hay into a fully blended feed ration!**

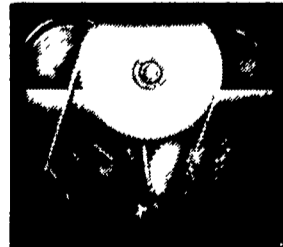

Oswalt has taken its time-proven Commercial Style 4 Auger Ensilimixer — the Feed Mixer that has set new standards for performance and durability and put all of those features into the totally new **High Performance RuffageMaster**

- Tuff-Glide Side Liners
- Tuff-Glide Front Auger Bearings
- Tuff-Glide Lined Conveyor
- Hay Augers & Knives
- Oil Bath Drive & Grease Bank Lubrication
- Constant Velocity Tumbler Shaft
- Optional Tuff-Glide Bottom Liners
- High Capacity 40 inch Discharge Conveyor

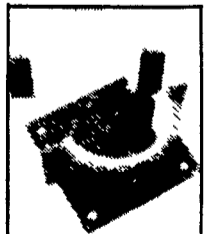

Exclusive Tuff-Glide mixing chamber liners. You will probably never have to replace a mixer side or bottom (when lined with Tuff-Glide), because Tuff-Glide is not affected by acid and moisture and Tuff-Glide resists abrasion. Also, because the super low friction material is self-lubricating,

it greatly improves mixing efficiency and capacity, while reducing the horse-power required to mix

**Rugged Rear Drive**  
Massive, H.T. alloy shafts, bearings and chains on hardened sprockets are standard features on this rugged unit. Shafts are welded and permanently aligned in the auger tubing, eliminating flanged shimming to maintain alignment. All rear auger bearings are located inside the oil bath drive

**Tuff-Glide Auger Bearings:** The sleeve style front auger bearings, made from Tuff-Glide, require no grease and are not affected by moisture or acids
