S&S Silo Service  
prepares the silo  
surface by using  
a 3,000 lb. pressure  
washer, thus  
making the silo  
moist, making a  
much better  
surface to bond  
shotcrete. After  
shotcreting, S&S  
always takes

away any roughness by applying a steel trowel finish.  
The excellent bonding of shotcrete to the silo will  
keep out moisture and prevent mold from growing on  
the side of the silo.
