RUFF-TUFF POLY SILO LINERS
 for Upright Silos
 If Your Silo Needs New Life...

Try Our Poly Silo Liners

- THE ADVANTAGE OF A POLY LINER -
- Spoilage is reduced around doors.
- Feed is exposed to less oxygen - better fermentation.
- Allows storage of high moisture grains or dry grains in a conventional silo.
- Delays repair or replacement of corroded silos.
- Prevents corrosive acids from contacting silo wall - extends silo life.
- Quick installation.
- Effectively seals silos from air and weather.

Ruff-Tuff Poly Silo Liners Come In Standard Lengths Of 40, 50, 60 and 70 Feet. The Liners Are Manufactured To Fit Most Standard Diameter Silos.

ATTENTION FARMERS Strengthen And Reseal Your Silo With Shotcrete

STRONGER AND WILL OUT LAST PLASTER
S & S Silo Service Has 10 Years Experience With Shotcrete Relining

IS YOUR SILO READY TO BE FILLED WITH GRASS SILAGE?

PLEASE CHECK YOUR FILL PIPES AND DISTRIBUTORS NOW BEFORE FILLING SEASON

S&S Silo Service prepares the silo surface by using a 3,000 lb. pressure washer, thus making the silo moist, making a much better surface to bond shotcrete. After shotcreting, S&S always takes away any roughness by applying a steel trowel finish. The excellent bonding of shotcrete to the silo will keep out moisture and prevent mold from growing on the side of the silo.

"MAKING GOOD SILAGE"

Probably no other ingredient fed in cattle rations today varies so much in "quality" as silage. It takes common sense, attention to details, and solid management to make good silage.

At least nine factors affect silage quality. Rather than acting independently, they interact to determine silage quality:

"The 9 Factors"

1. The Crop	6. Silo Structures
2. Stage of Growth	7. Feedout
3. Moisture	8. Weather
4. Fine Chopping	9. Additives
5. Filling, Packing and Sealing	

Since 1908, SOLLENBERGER SILOS CORP. has been providing the Silo Structures now in demand by more and more farmers concerned about "silage quality." "Nothing keeps feed better than our poured concrete silos."
