Viking Ship Calcium Nitrate:

vegetable nutrition the way you want it

Viking Ship Calcium Nitrate fertilizer 15.5-0-0 has been earning vegetable grower loyalty for more than forty years. In the field! Under weather conditions that often fail to cooperate! At harvest, when talk time is over and product promises are measured by results! Growers have found that Calcium Nitrate comes through.

Use Calcium Nitrate on your next crop. You will be pleased by the growth, yield and quality you see. The kind of profitable results achieved by vegetable

**Nitrate Nitrogen • Fast Response
 Early Maturity • Non-Acid
 Available Calcium • Precise Timing
 Controlled Growth • Water Soluble**

growers across America, season after season, because of Calcium Nitrate's unique combination of nutrients:

Nitrate nitrogen for fast response. Better timing and control. Calcium Nitrate supplies nitrate, the non-acidifying nitrogen that's readily available for plant uptake. You'll see fast, uniform response with the precise feeding and timing you need for better growth and better crop management.

See Your Fertilizer Dealer

Earlier, more uniform maturity. Improved yield and quality.

Nitrate nitrogen gives the quick optimum response the crop needs and then "runs out." Elimination of residual nitrogen and salt problems promotes better yields, uniform maturity and harvest efficiency. One good thing leads to another when you fertilize with Calcium Nitrate.

Vital calcium: it helps your crop; helps your soil. Calcium Nitrate contains 19% water-soluble calcium. This vital nutrient, combined with nitrate nitrogen, provides crop benefits both above and below the ground. Young leaves, stalks, roots and fruit must have calcium for proper development. Adequate calcium in the fruit markedly improves harvest and shipping quality. This low-salt, non-acid source of nitrate and calcium is unmatched by any other nitrate fertilizer.

Available in bag or bulk. Apply Calcium Nitrate straight or ask your dealer to include it in your vegetable fertilizer. You'll be glad you did!

As with any fertilizer application, consult your extension office or other advisory service for recommended practice that meets local crop and soil conditions.
