

**Introducing Synchro-Max 2000™.**

Recently there has been a lot written about the advantages of ration balancing based on Rumen Available Protein and Rumen Available Carbohydrate (RAP/RAC).

Now Agway has taken the RAP/RAC concept a giant step further with the development of the Synchro-Max 2000 line of dairy feeds, a unique and comprehensive feed and ration balancing program, *proven* to increase milk production at minimal increased cost.

Field demonstrations at 13 Agway-member

farms with RHA's of 20,000 lbs. and more showed an average production increase of more than 3 lbs. per cow, per day. At an increased feed cost\* of just one cent per cow, per day!

The critical ingredient? Synchronization. For maximum efficiency and nutrient utilization, it's critically important that the *right amounts* of protein and carbohydrate energy be available in the rumen at the *right time*. Using a proprietary database of innova-

tive feed technology, your Agway Farm Enterprise Salesperson will first determine the RAP/RAC values of your forages. Then he will design the correct Synchro-Max 2000 feed program for your farm. For maximum production and profitability.

Ask your Agway Farm Enterprise Salesperson about Synchro-Max 2000, available *exclusively* from Agway. Whatever your herd's RHA, he has the feeds, technology and input to improve your output.

\* Compared to feed fed prior to RAP/RAC
