WESTFALIA HIGH-TECH DAIRYING

WESTFALIA HAS A HIGH-TECH MILKING SYSTEM FOR YOU!

WALK-THRU AUTOMATIC ID SYSTEM

COMPLETE BY EXCEPTION

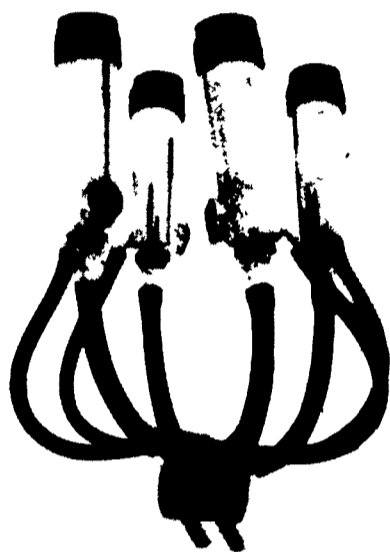

Advanced technology that's simple to use, Metatron connects to the Westfalia PC Operating System Dairy Plan, an integrated management program. Metatron will automatically notify the operator if a cow is milked after cluster removal. Once a cow ID is entered, the cow side control box automatically signals for actions of heat, do not milk, or health code. This provides early and economical detection of health problems, allowing the operator to control individual cows.

ITEM

Metatron provides a unique Walk-Thru identification system. A coded unit on the cow's comfort chain identifies the cow to a particular ID number. Walk-Thru can be mounted at the entrance of a milking stall or a parallel stall to identify individual cows as they walk through.

Your Milking System Complete!

Metatron gives you effective economic management. This DHIA and USDA approved meter provides milk metering on an individual cow for in-parlor evaluation. Vital milk production, maximum milk flow, average milking time is also available at cowside. Or manage each individual cow.

Westfalia's BIO-MILKER

*It's Something
Else!*

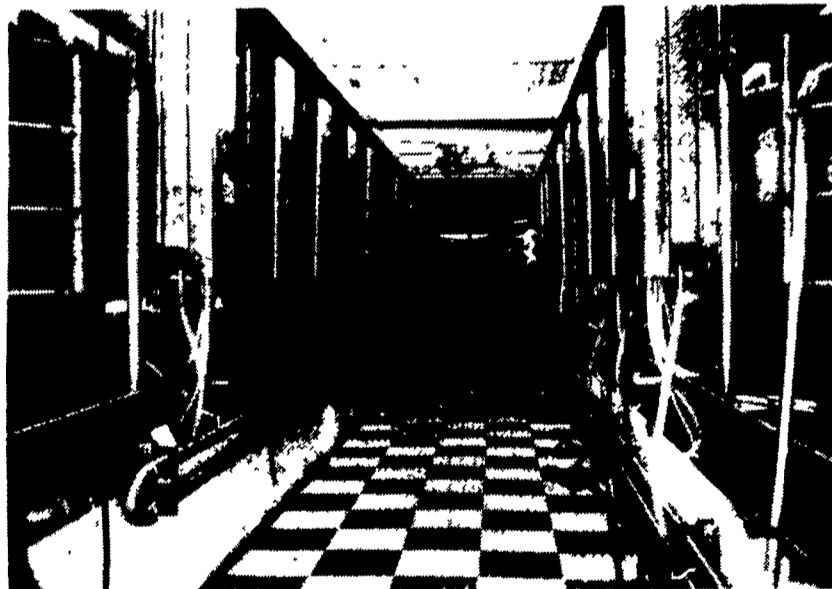

The Bio-Milker Multiplies
Your Profits - It's The Best
Way To Better Milking!

Specially designed to regulate your milking operation, this positive pulsed air bleed milker assures harmony between udder and cluster. Milks with lower vacuum levels even in stanchion barns with a high milk line.

- Healthier Udders
- Reduced Milking Times
- Superior Milking Out
- High Milk Yield
- Reduced Cell Count
- Longer Productive Life Of The Cow
- Increased Profitability In The Shed

WESTFALIA TAKEOFF ARM

- Precise electronic milk flow monitoring for accurate and dependable takeoff
- Built-in Milk Meter displays milk produced
- Can be tied to a Westfalia PC System and ID System for further management control
- Red light easily visible from any point in the parlor to communicate needed information to the dairyman

- All SS control, arms, chain, and hardware for maximum life
- Counter balanced arm keeps milker supported under cow for less fall-offs. In case of a fall-off it keeps the milker out of the manure
- Maximum strength SS arms and rubber shock absorber take cow punishment
- Will work with Westfalia Stimulator pulsator or backflush systems
