

MARYLAND DHIA

The January, 1992 DHI information for Maryland dairy herds is listed by herd name, county, total number of cows in the herd, and the average production per cow on a 3.5% Fat Corrected Milk (FCM) basis for all milking cows in the herd. The herd must consist of at least 10 cows averaging 60 lbs. or more of 3.5% FCM per cow per day. All of the herds are on official DHI or DHIR test. Also listed are the top 10 herds in Maryland for the Brown Swiss, Guernseys and Jerseys, and the top eight herds for Ayrshires.

For Yield, Quality and Persistence W-L Alfalfa stands all year after!

Today's successful growers work harder than ever before — but they also work smarter. Alfalfa farmers across the country recognize that in tough times, they can't afford to gamble with anything less than W-L alfalfa seed to give them the high yields, quality forage and long stand life necessary for a profitable crop. They also know that W-L alfalfas are backed up by over 25 years of research, technical teams of experts and a reliable, service-oriented distribution system.
You can't buy better alfalfa seed than W-L — you can't afford to buy less.
