Northeast Chicken Parts

Wednesday, April 22, 1992

Trucklot buying interest ranged light to fairly good and about as expected for mid-week needs. Demand for boneless skinless breasts was good where major features were in progress, otherwise, retail demand was only fair. Trucklot volumes of line run breasts for immediate needs were all booked at steady prices; however, buyers resisted higher asking prices for next week production. Some early morning buyer inquiries for leg quarters was reported but that market was quiet by mid-morning. Demand for yellow skin wings was very good, supplies were tight, and prices trended higher.
