

Weber Looks Forward To First Reunion For FFA Officers

Editor's Note: The Pennsylvania FFA Foundation, assisted by eighteen former FFA state officers, has begun an ambitious search for former state officers - their addresses, what they are doing now, and recording their remembrances as a state officer and their thoughts today about the FFA and what it meant to them to be a state officer.

This article is in part the result of those searches. It is hoped that the Lancaster Farm-

ing's readers will be stimulated to aid in this search to find all the state FFA officers elected since 1931. If you know of a former state officer living in your area please either call Mary Jo Cancelmo, Foundation Executive Director (215) 648-0674 or write to the Foundation at Calder Square, P.O. Box 10493, State College, PA 16805.

Glen Weber is looking forward to the first state officer's reunion for several reasons, it will be his

state officer's team 25th anniversary. The other members of his team were. "As we went our separate ways after serving the '66-'67 year together as an officer team, we seemed to disconnect over the years. But as I reflect back on our lives since then, I feel it is important to not lose sight of who we were and where we have been before. That one year of being an FFA state officer had a tremendous effect on all of us for the rest of our lives."

When asked about the motivating force behind running for state office in the Pennsylvania FFA, Weber replied as have so many other state officers - "Going to the national FFA convention in Kansas City". The national FFA convention has been instrumental in producing positive motivating goals for FFA'ers all over the country. "You are looking at your own peers, who set goals and achieved them. Whether they are individuals who are being recognized as star farmers, team contest winners, or even national officers, those participants set the example for others to follow. I would say the national FFA convention is the number one selling tool the FFA has.

"I will never forget my sophomore year at Kansas City. The national president that year by the name of Williams, was on stage before thousands of FFA'ers, talk-

Son Justin Weber on a favorite horse.

ing to the President of the United States, Richard Nixon. This was being broadcast live before the audience. President Williams had the poise to just talk to the President just as if he were his dad. I'll never forget that - it had a tremendous impact on me."

Weber left that convention determined to one day be up on

stage in Kansas City as a national officer. He began, under the guidance of Garden Spot High School chapter advisor, Bob Herr. On the local chapter level he was elected chapter president and then Lancaster County president. The summer after his senior years, Glenn was elected state president. (Turn to Page A25)

When Livestock Do The Shopping

You need the efficiency of a Harvestore structure. It easy-loads from the top and wisely unloads from the bottom. You can store grain at natural, high moisture levels* because a Harvestore structure minimizes spoilage and preserves the grain.

The price differential between a Harvestore system and other less efficient grain storage processing systems has shifted dramatically in the past few years. Before repairing or investing in outdated technology, contact your authorized, independent Harvestore Systems dealer

FARMING FOR THE FUTURE with **Aer-Way**

➔ A new AERWAY can be your ticket to INCREASED PROFITS and help you comply to your conservation plan. ➔

Helping Ranchers and Dairymen Make Better Hay and Pastures Throughout the Nation.

UNIVERSITY TESTS SHOW
AIRWAY-ING PAYS

- Increases yield and quality
- Important part of intensive hay and pasture management
- Helps conserve valuable soil, fertilizer and water.
- Reduces compaction
- Improves manure management
- Reduces run-off
- Promotes extended stand life

"Earlier this spring, I used the Aer-Way implement and Aer-Way chain harrow on my rolling pastureland. This was done to open up the ground to get water into the sloping grasslands. At the same time I pulled the Aer-Way chain harrow to scatter the cattle manure around. Even after the dry summer we had, I noticed that the Aer-Wayed ground held the moisture better and we got thicker and taller regrowth where we ran the machine."

DR. Rex Wilhelm D.V.M., Stuart, Iowa

"I have better pastures since I started using the Aer-Way to aerate and renovate my pastures. Using the Aer-Way has helped me get the nutrients where they are needed. I would not recommend fertilizing or liming without running the Aer-Way first."
Sandy Fisher, Brookview Farm - Beef Cattle Operation
Manakin-Sabot, Virginia

"This year we ran the Aer-Way over half the land where we had harvested corn silage. We then spread between 4,000-5,000 gallons of liquid manure per acre and disked the seed bed to prepare for small grains. We were absolutely amazed at the difference where we used the Aer-Way and one disking. My non-Aer-Wayed ground was disked 3 to 4 times and still wasn't as good. I would recommend the Aer-Way to other farmers as it softens the ground and lets rain and manure penetrate instead of running off."
W.W. Sandford III -
Kenwood Farm, Orange, Virginia

FLEXIBLE CHAIN HARROW
One of the heaviest in the industry.
