# PERFORMANCE TOP DRESS

**NEW**

**Advantage  
20%**

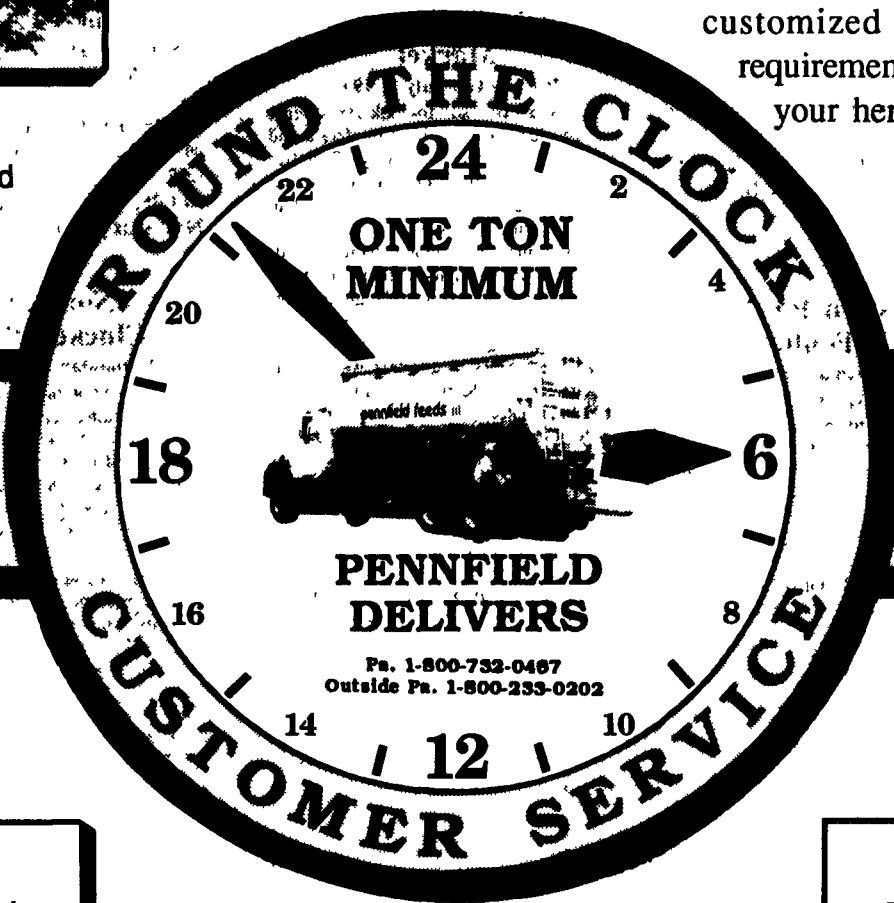

Advantage is a new line of high performance dairy feeds from Pennfield. It contains select sources of high quality blood meal and fish meal. Blood meal is an excellent by-pass source of the amino acid Lysine. Fish meal, an excellent source of by-pass protein, has also been shown to increase rumen bacterial protein synthesis — Rumen bugs work harder.

Combine these features with the steam crimped soybeans, steam flaked corn, balanced proteins and carbohydrates, plus vitamins and minerals and you have Pennfield's new Advantage Feed Line. Advantage Feeds are available in any protein % from 14% to 36%.

Advantage may also be used in a Pennfield FR — Precision Formulated Ration — customized to meet the production requirements and forage being fed to your herd.
