RUFF-TUFF POLY SILO LINERS

Now With New Expansion Ring For Easy Installation
If Your Silo Needs New Life...
Try Our Poly Silo Liners

- THE ADVANTAGE OF A POLY LINER - Spoilage is reduced around doors.
- Feed is exposed to less oxygen - better fermentation.
- Allows storage of high moisture grains or dry grains in a conventional silo.
- Delays repair or replacement of corroded silos.
- Prevents corrosive acids from contacting silo wall - extends silo life.
- Quick installation.
- Effectively seals silos from air and weather.

The Liners Are Manufactured To Fit Most Standard Diameter Silos.

ORDER YOUR NEW SILO WITH A FIBERDOME CHUTE OR REPLACE YOUR OLD WORN OUT CHUTE

fiberdome SILO CHUTE

made with fiberglass, the material of the future — and proven in the past —

The Fiberdome chute is designed and engineered to be installed on most types of silos. Its structure allows it to withstand the toughest beating the weather elements or silo unloading systems can possibly dish out.

The chute is constructed in full 7 1/2' sections to minimize the number of joints. Connecting joints have a 2 1/2" tongue and groove design to keep feed in and water out. The large ribbed construction adds stability and strength.

Fiberglass is durable, corrosion-proof, attractive and translucent, allowing sunlight to pass through. Sunlight quickly dries interior moisture in the chute. The hard gleaming gelcote surface will remain for many years.
