### Delmarva Broiler-Fryer Market

Tuesday, July 14, 1992

Movement of ready-to-cook whole birds was about moderate. Supplies were adequate to short with availability reduced by hot, humid weather conditions. Live supplies were moderate to light. Weights were desirable to light. Slaughter schedules were cutback at several plants, primarily due to weight losses in the field. However, schedules remained heavy overall. Trade sentiment was steady to fully steady. In the part complex, wings were in strongest demand. Other items were adequate to closely balanced with pricing tied more to a decrease in production than to an active call for supplies.

### Northeast Chicken Parts

Wednesday, July 15, 1992

Trucklot buying interest continued light and limited to immediate needs. Supplies of boneless skinless breasts were in close balance and some buyer inquiries for late week went unfilled. Sellers asked higher prices for tomorrow's production or would not quote a price until the market develops. Line run breasts labored under a heat-related market, supplies were tight, some shippers asked higher prices for late week deliveries but some buyers continued cautious. Yellow skin leg quarters cleared to a fair demand but white skin product was a struggle. Wings were short of covering a good demand and prices trended higher.
