 - Versatile, hard-working hydraulics
 - Roomy new deck designs
 - Comfortable cabs
- Come on in and we'll show you the model ready to work for you!

6640 & 7740Z IN STOCK!

NEW! Exclusive design produces best-ever bales

The unique New Holland Models 650 and 660 Roll-Belt™ round balers make the best quality bales ever. Tight bales — dense bales. Good-looking, square-shouldered bales that hold up to the weather. The patented Roll-Belt™ design means fast, sure core formation, even in the toughest crops. The adjustable hydraulic belt-tensioning system puts maximum bale density control at your fingertips. And, you can choose from three optional automatic tying mechanisms for the smoothest package ever.

Harvest your crop with the best in self-propelled harvesting

If you custom harvest as well as chop your own forage, a self-propelled harvester like the Model 1915 can help you harvest more crop at peak quality. The fuel-efficient 270-horsepower diesel engine and the 24-inch, 12-knife cutter head gives you high-capacity day-in and day-out harvesting. And the exclusive automatic knife sharpener and automatic shearbar adjuster, called Accucut™, combine to give you precision-sharpened knives and a reset shearbar, all from the comfort of the cab. Stop in today and let us show you the other features of the "1915." Or better yet, let's set up a time to demonstrate this harvester in your own field.

Load... unload faster and easier

When you're working the big loads you need the Super Boom advantage — extra reach. With more forward dump reach you can center load your largest spreader from one side so you get an even load. The result: faster loading, fuller loads and easier unloading. With level bucket lift you load more and lift higher... with less spillback. And, with a longer wheelbase there's more stability and safety. So, why get stuck with anything else? Find out just how good a skid-steer loader can be.

Capacity and efficiency for fast harvesting

When it comes to harvesting, you can't beat the heavy-duty performance that's built into the New Holland Model 790 forage harvester. Performance starts at the cutterhead. The 19 11/16-inch wide, 12-knife cutterhead delivers a fine uniform chop that's just right for most silage feeding operations. And an electric clutch gives instant response and positive control on the reversing gearbox. The Model 790 is available with either a 540-rpm or a 1000-rpm PTO drive. Stop in today and trade for the performance leader in harvesters — the "790" from Ford New Holland.

First in durability

Surveys show owners rate New Holland grinder-mixers as the most durable. That's because Ford New Holland builds them right and backs them with quality parts and service. The Model 358 has a 125-bushel tank that's specially designed to eliminate bridging. An optional electronic scale assures accurate control of rations. Stop in and see the durable Model 358 grinder-mixer.

Seeing is believing

Every minute you can save at the blower means more loads per day and more overall productivity. Let us demonstrate the New Holland Model 40 forage blower and we believe you'll agree you can increase your silage productivity. The Model 40, with 20 percent greater tip speed than previous models, center fills silos over 80 feet high. The Whirl-A-Feed® table spins the crop into the blower housing at high speed, making more efficient use of your tractor's horsepower. See us soon for a demonstration of the Model 40.
