GLU-LAM STRAIGHT BEAMS

Rigidply Rafters laminated beams offer many advantages when building Homes, Schools, Churches and Commercial, Recreational and Agricultural structures. Our beams are available in Industrial, Architectural and Premium Appearance Grades. The rich warm feeling they create enhances any structure.

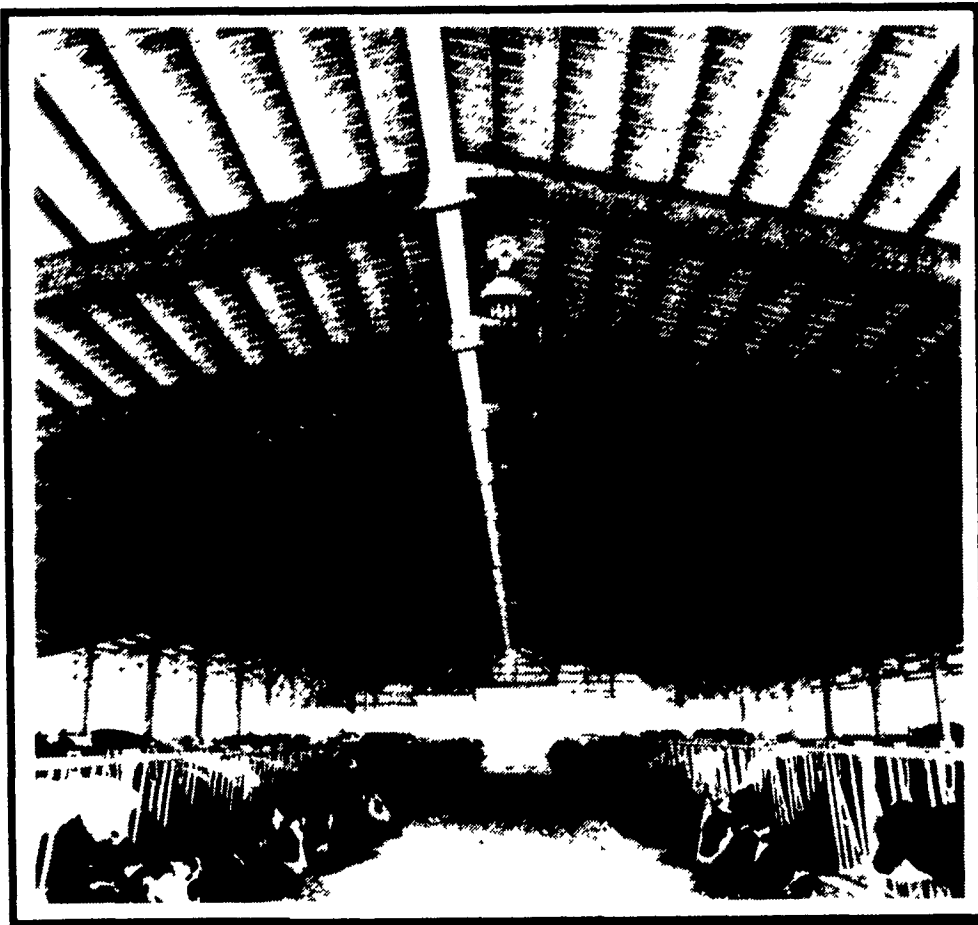

Laminated beams are superior in all strength characteristics to solid sawn lumber; they resist checking and twisting because of the use of multiple plies of kiln dried lumber, bonded together with phenol-resorcinal glue.

Rigidply Rafters Inc., has been manufacturing glue laminated products since its initial start up in 1954. We are confident that with our efficient manufacturing plant, team of quality control experts, engineering and sales personnel, we can ensure you a dimensionally stable and dependable product.

Since quality is our number one concern, the glue joints are routinely tested in the Rigidply Quality Laboratory for strength and durability.

To better serve you, we offer our beams in a variety of lumber species: Southern Yellow Pine (CCA treated and untreated), Douglas Fir, Poplar and Cedar.

In the final phase of the manufacturing process the beams can be cut, drilled, stained and sealed to your specification. A protective wrapping can be applied to maintain the beauty and quality of the beams during delivery and installation.

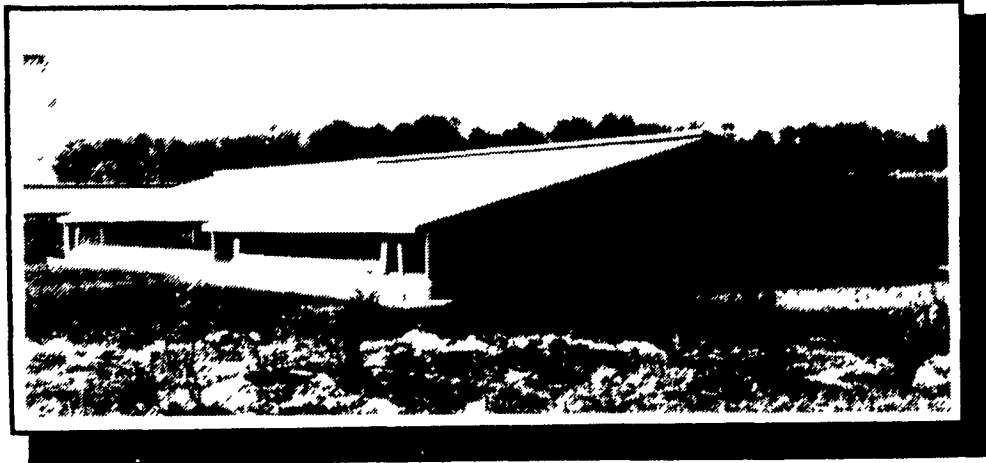

108' x 204' (Interior view) Free Stall Barn
Featuring Glu-lam straight beams & Glu-lam posts

Manufacturers Of:

- Glu-Lam Arches
- Glu-Lam Beams
- Glu-Lam Treated Posts
