- HD Swivel Coulters Cut through heavy residue Track on contours
- Narrow Vee Row Units Positive seed placement
- E-Z Adjust Presswheels New spring cushion Precise seed depth control
- HD Frame and Drives Tough, long life

KASCO PORTABLE BAND SAW MILL
Model KS-4038

"The Saw II-A" is a band saw mill built to cut dimensional lumber from a log, accurately and smoothly. The Kasco mill is built durable, having heavy 2"x3" tubing, 4" channel iron and 1/4"x10" plate in mill frame. Track is of 4"x4" 2 1/2" angle iron. Heavy shafts on which the blade wheels run are 1 1/2" diameter and 37 1/2" long, supported on each end with heavy ball bearings, giving extra stability and longer, trouble-free life.

Kasco, having built farm equipment for 25 years, has learned by experience more than by the book that extra iron along with good design and good workmanship go together to make a piece of equipment that is durable, holding its value like a machine tool.

Thus, a customer of "The Saw II-A" can expect the equipment to give years of satisfactory service.

Meyer MFG. CORP

DORCHESTER, WI
Ph. 715-654-5132 For Your Local Meyer Dealer

NEW! TSS

SUPER SPREADER

New Advanced design

Let Meyer Help You Manage Your Manure!

The new Meyer Super Spreader is a revolutionary machine. Our double auger, rear unload spreader keeps manure off of you, your tractor, and your spreader. The rugged double expeller system rips away tough pen or frozen manure and applies it to your field in a smooth even pattern. In semi solid manure, the flow control gate can be regulated to apply just the exact coverage you desire. No one likes the job of handling manure but Meyer has just made it easier. The Super Spreader has fewer moving parts, no apron chains to break, and no leaky end gate to mess up your driveway or town road. This is one tough machine and it's ready to help you manage your manure.

Farm Equipment Buyers Trust The Name Meyer

E-Z TRAIL, INC.

HARVESTING AMERICA

in the 90's...

with wagons and grain carts built for the 2000's
