MIST SPRAYER ADVANTAGES

1. ROTARY ATOMIZATION distributes an even size droplet spectrum that greatly improves penetration and coverage.
2. LOW FIRST COST compared with conventional sprayers with the same acreage capabilities.
3. COST LESS TO OPERATE: 50-90% savings on diluent. Water swaths at higher speeds with less tank fillings. Save a bundle on fuel.
4. SAVE ON COSTLY CHEMICAL. More complete coverage with 25-50% less chemical compared with conventional dilute solution sprayers.
5. LOW MAINTENANCE. Simple design with few moving parts means little upkeep. No down time due to repairs or plugged nozzles.
6. MORE EFFICIENT CONTROL as a result of fine particle efficiency through distribution of chemical.
7. COMPACT UNIT — use of smaller tractors and no booms to contend with.
