NORTHEAST BROILER/FRYER PARTS. FEDERAL-STATE  
Trucklot buying interest was very light. Supplies of boneless skinless breasts for retail needs were at least adequate at most locations; however buyers were very cautious and brought in product for immediate needs only. Line run breasts were readily available, offered, and not cleared. Further processors limited receipts of cutting stocks to standing commitments as they wait for the market to develop. Yellow skin leg quarters were fully adequate but a slight improvement was noted over early week. Trading was reported at lower prices. Other items were adequate and traded at steady prices.

AUGUST 19, 1992  
NATIONAL EGG MARKET - AT A GLANCE:  
The market tone was generally fully steady to firm. Demand varied but was mostly moderate. In several areas retail promotional activity was stimulating some additional buying interest. Supplies were moving into a closer balanced position with some dealers attributing the tightness to increased molting. Breaker activity was moderate for the light offerings. Available product was held with increased confidence.
