

Drill/Planter Hitch Uses Drills 10-20 Feet Wide

ALVA, Okla. — Baker Manufacturing has introduced a new drill/planter hitch, the Baker 2250.

The hitch can be used with 10 feet or 15 feet John Deere 750 drills, or a 6- or 8-row planter setup. The 2250 drill/planter hitch can also be used with nearly any drill from 10 feet to 20 feet wide for a 40-foot working width.

By means of a single hydraulic lever, the 2250 hitch can be folded for road transport or unfolded for work in the field. Folded, the 2250 hitch establishes uniform transport width, resulting in safer on-road travel.

The hitch is constructed of sturdy 5 inch x 7 inch x 3/4 inch rectangular tubing. The 2250 drill/planter hitch is carried on high flotation IILx15 inch tires to achieve maximum coverage on a wide variety of field conditions.

As with all Baker products, the 2250 drill/planter hitch is backed by Baker's limited 5-year warranty. For more information on the 2250 drill/planter hitch or any Baker product, contact Baker Mfg., South Highway 281, Alva, OK 73717, (405)327-0234 or toll-free (800)256-5996.

Baker Manufacturing new drill/planter hitch, can be used with 10 feet or 15 feet John Deere 750 drills, or a 6- or 8-row planter setup.

“When Our Dairy Was Destroyed, Old Guard Came Through.”

We were devastated when fire destroyed our three-barn dairy complex and most of the livestock. Fortunately, Old Guard responded promptly. In just two weeks we had a check for more than \$440,000.”

Dairy farmers like Bill Johnson know how important it is to have the protection of Old Guard's prompt, efficient claim service. When you want dairy insurance you can rely on, look to Old Guard. We've been insuring dairy farmers since 1896. Dairy farmers like Bill. Dairy farmers like you.

Call today to find out more about our insurance programs designed to meet the specific needs of dairy farmers.
