

With this concentrate feeding system LESS MEANS MORE

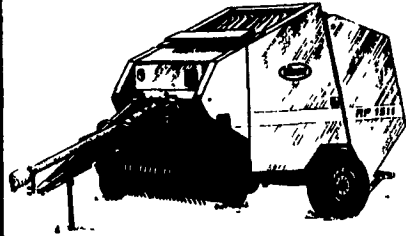

Dairymen report a 7-8% increase in milk yield with 5% less concentrate input with the new VA 500. Each cow's ration is fed automatically according to her individual lactation curve. Feeding for production means high producing cows get more. Every cow pays her way. The whole herd can be housed together and you don't need complicated computer support systems for operation.

Make your concentrate work harder.

Designed to Perform

- Hydrostatic drive
- Wide-view cab
- Electronic harvest monitor
- 221 hp Mercedes Benz engine
- 12,322 separation area

WE REPAIR COMBINE TABLE AUGERS

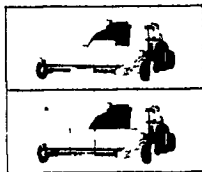

It pays to be square

For custom operators, Vicon's new Compact 800 high density baling system delivers baling speed and packing capacity - up to 20 to 24 tons of hay per hour - in a square package that's right for stacking, handling, transport and feeding.

Bales are 2'8" x 2'8" square, variable in length from 2'8" to 8'3". They stack like brick and mortar so hauling is safe and economical.

Maneuverable shape, variable sizes and layered composition make Compact 800 square bales the choice for handling and feeding in any operation.

The Square Answer.

Bringing technology down to earth.
