**Big Baler...  
 big performance**

Hesston's Model 4900 Big Baler is truly a "Hay Factory". It utilizes a concept similar to other Hesston center-line balers, but on a larger scale—45.6'x50'x8' to be exact. The 4900 lets you put the equivalent of 20 to 30 conventional bales into a single Big Baler! But, it requires 30 to 40 percent less storage space than conventional 2-twine bales. And the Big Baler uses 30 percent less twine to do it! Hesston's exclusive flake-forming concept assures uniform, high-density bales while standard hydraulic density control maintains consistent bale density and weight. See your Hesston dealer now for a Big Baler with big performance!

**BIG SHOT  
 PRODUCER**

Don't let the size of our 4750 high-capacity baler fool you. With the dimensions of a mid-size, it makes high density bales up to 31.5" wide by 34.4" high and as long as 98". All you need is a minimum 90 PTO hp tractor to handle it. A plunger speed of only 41 spm means high quality hay, with less damage to tender leaves. In an efficient charge chamber, nutritious leaves are distributed throughout each flake - with minimum loss. With the 4750's self-contained hydraulic control mechanism, bale density is simple to set and control. And the electronic monitor checks 10 different baler functions. Stop by your AGCO/Hesston dealer listed here and ask about our flexible financing plans on the 4750. Or on our wide selection of other equipment, all backed by the AGCO Warranty Program. You'll see why Hesston is quickly becoming a star in the field.
