

ABS Adds 13 Pa. Bulls To Sample Lineup

DEFOREST, Wis. — A Midwestern-based artificial insemination business has announced the entry of 13 Pennsylvania Holstein bulls and one from New Jersey for progeny testing.

These 14 join more than 300 young dairy bulls being tested this year through the American Breeders Service Progeny Test Program.

The semen is to be distributed within contracted herds across the U.S. After a four-year wait, the progeny are to be evaluated and a decision made as to whether or not the bulls qualify to join the business's lineup of proven sires.

All bulls were selected based on genetic lineage and potential.
