

Feed Waxy Corn

Waxy corn is 100% Amylopectin Starch which is more digestible. Improve your milk production and butterfat. Improve your weight gain in beef, cattle and hogs. For more information about buying waxy corn silage or high moisture corn or buying C.F.S. waxy seed corn, call

Have you tried toasted grains?

Consider these advantages over traditional roasting methods

- ◆ Consistent low moisture levels and by-pass protein levels
- ◆ Improved energy density of your rations
- ◆ Excellent quality control.
- ◆ Exchange programs with feed mills.
- ◆ Economical storage, rolling and grinding available
- ◆ We also buy corn and soybeans

A LOAD OF MIRACLE BREWER'S WET GRAINS ... LOADS MORE MILK

Have you considered brewer's wet grains to give your herd's production a boost? Brewer's wet grains from Miracle Feeds are an excellent protein and energy source. They can readily make up to 20-30% of the ration's dry matter. Combined with Mc Ness vitamins and minerals they can provide a very efficient rumen by-pass way to feed

Researchers estimate that between 45-55% of brewer's wet grains' protein escapes rumen degradation compared to only 25-30% for soybean meal. This by-pass protein is more efficiently digested and absorbed in the cow's small intestine

For more information on the use of brewer's grains and other by-products, plus Mc Ness premixes, contact Bob Hoffmann at (716) 344-3930
