## **ADADC** Approves **Marketing Plan**

SYRACUSE, N.Y. — The board of directors of the American Dairy Association and Dairy Council, Inc. (ADADC) recently approved the advertising and promotion plan for 1993.

- The estimated budget of \$11.2 million will fund advertising, educational programs, and specific promotions to encourage the consumption of milk and milk products.

In 1993, advertising will communicate two separate messages: one for milk and one for cheese. The milk message to consumers will be "do something good for your body." It will focus on the psychological satisfaction and physical benefits derived from drinking milk.

Fluid milk commercials will target consumers 25-54, since they represent 48 percent of the total population and 34 percent of the milk volume.

Cheese advertising and promotion will target consumers ages 25-54 with an emphasis on women. The message to consumers will focus on the great taste and versatility of cheese, especially in sandwiches, which is 45 percent of the total usage of cheese. Ninety percent of the cheese purchased at retail level is consumed during mealtime.

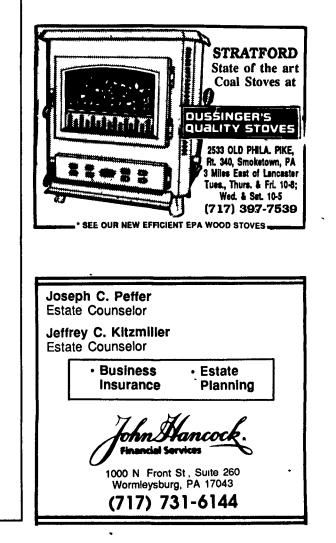

Approximately \$7.6 million will be targeted for television and radio advertising in ADADC's 10 local media markets, including New York City, Syracuse, Albany/Schenectady/Troy, Wilkes Barre/Scranton, Harrisburg/Lancaster/Lebanon/York, Utica, Binghamton, Elmira, Watertown and Burlington/Plattsburgh.

Supermarket retailers will continue to be key partners in ADADC's marketing program. The consumer promotions department will work with retailers, manufacturers, and dairies to implement improved dairy case management techniques and point of sale activities. Training seminars will continue to be part of ADADC's dairy case space management program.

New this year will be the implementation of retail store level audits in all major ADADC markets to rate stores on their product availability, attractiveness, cleanliness, and space allocation.

The nutrition education department will focus on several key programs that include the placement of school curricula with second and fourth grade teachers, working with selected districts to promote the school breakfast program, and emphasizing calcium's role in health. These programs are geared to influence children and adults to consume dairy products as part of a balanced diet.

ADADC's communications department will work with the news media to promote dairy products through four public relations campaigns and by aggressive action towards dairy misinformation in the popular press. Coordinating and assisting in the state dairy princess programs and providing communications to members will also be coordinated through the department.

We were devastated when fire destroyed our three-barn they complex and most of the livestock. Fortunately, Old **Guard responded promptly. In just two weeks we had a** check for more than \$440,000."

Dilley farmers like Bill Johnson know how important it is to how the protection of Old Guard's prompt, efficient claim **cer when** you want aairy insurance you can rely on, took to Old Guard. We've been insuring dairy farmers since 1896. Dairy farmers like Bill. Dairy farmers like you.
