QUANTEM SERIES 50

Temperature Modulating Fan Speed Control

Designed to be splash and dust resistant in accordance with NEC Article 547

The "Vari-Speed" VENTILATING Control is a SOLID STATE, single phase, variable motor speed controller, designed to automatically ventilate industrial, commercial and agricultural facilities. The Series 50 provides ventilation control in proportion to the error sensed between the controller set point and actual space temperature as monitored by the controller's sensor. As temperature changes, voltage to the fan motor is changed proportionately.
