Purina Mills Dairy Consultant

FRESH COWS STALLING OUT???

Now There Is Something You Can Do About It!!!

Purina Freshener Pak Starts Cows Right.

Fresh cows go off of feed for a number of reasons: freshening problems, mastitis, forage changes, too much grain, ketosis and just plain stress. That's why Purina has come out with a product designed with this key problem in mind.

Dairy Freshener Pak is designed to not only stimulate your fresh cow's appetite, but it also helps her maintain a proper immune response.

HERE IS WHY

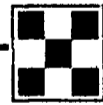

Dairy Freshener Pak contains these valuable ingredients in a palatable 4 ounces/day feeding rate:

- | | | | |
|---------------------------------|--|-----------------------------------|---|
| Niacin - | This slows fat metabolism and fights ketosis. | Vitamin - A & D | Extra vitamins for periods of low feed intake. |
| Yeast - | Live <i>Sacchromyces Cerevisae</i> works to improve ruminal fermentation and stimulate appetite. | Vitamin - E & Selenium | Essential in the immune function of the body and helps to maintain structure and function of muscles. |
| Vitamin - B₁₂ | Stimulates appetite and helps to correct low milk fat. | Oxytetracycline - | Reduces the incidence of bloat and increases milk production. |

TRY PURINA FRESHENER PAK ON YOUR NEXT GROUP OF FRESH COWS AND YOU WILL SEE IT WORK
