Youth Must Complete Safety Course

GETTYSBURG (Adams Co.) — Youth, 14 or 15 years old, who plan to be employed by a farmer to drive tractor and/or operate farm machinery must complete a safety course.

To successfully complete the courses, youth must attend seven consecutive Monday night meetings from 7 p.m.-9 p.m., demonstrate the ability to safely drive a tractor, and pass a written exam.

The first meeting will be held on Monday, February 1, from 7 p.m.-9 p.m. at the Adams County Extension Office, located two miles west of Gettysburg on Rt. 30 across from Doersom airport. A \$5 registration fee covers a personal copy of the instruction manual. A minimum enrollment of 10 is required. Any 13-year-old or older youth are welcome to attend the course.

Topics for the course and meeting places are as follows: February 1 - Safety Is No Accident, Extension Office; February 8 - Maintenance and Safety Checks And Instruments and Controls, Biglerville High School Ag.

Room; February 22 - Starting and Stopping Tractors And Tractor Safety on the Farm, Gettysburg High School Ag. Room; March 1 - Tractor Hitches, PTC, and Hydraulics AND Tractor Safety on the Road, Fairfield High School Ag. Room; March 8 - Why

Farm Machinery Accidents Occur AND Farm Machinery Accident Situations, Littlestown High School; March 15 - Safety Standards For Agricultural Tractors and Implements AND Farmstead Safety, Bermudian Springs High School Ag. Room; March 22 - Farm Machinery Field Nite by

New Oxford High School Ag. Dept. and machinery dealer cooperating. Also, April 3 will be the tractor driving skills test for each participant to demonstrate their ability to safely drive a tractor.

The training course is offered

jointly by High School Vo-Ag Departments and the Adams County 4-H Program/Penn State Cooperative Extension. Additional information may be obtained from your high school ag teacher or from county 4-H agent Jared K. Tyson at (717) 334-6271 or (717) 624-4525.

Figures Show Importance Of Industry

GEORGETOWN, Del. — Newly released information compiled by Delmarva Poultry Industry, Inc. (DPI), the non-profit trade association working for the continued progress of the Delmarva Peninsula's poultry industry, shows the chicken industry continues to grow, providing more employment and increased economic contributions to the area.

Broiler production last year totaled 548,500,000 birds, up nearly 2.2 percent from 1991, while the number of pounds produced rose more than 4 percent to reach 2.64 billion pounds. Each bird weighed an average of 4.8 pounds, heavier

than the national average.

Unlike many industries on the Delmarva Peninsula, the poultry industry increased employment in 1992. Close to 22,000 persons were directly employed in the industry, while thousands of others had jobs because of the poultry industry's presence. These 22,000 people earned more than \$367 million.

The poultry industry creates a built-in market for grain and soybean farmers on Delmarva. Most of the corn, soybeans, and sorghum raised by local farmers is used by the poultry industry. The DPI 1992 figures show that 22.1

million bushels of soybeans, 62.5 million bushels of corn, and 1.33 million bushels of sorghum, with a farm value of \$303 million were used for poultry feed.

Processed and ready for market, the 548.5 million broiler chickens were valued at \$1.25 billion, an increase of 8.25 percent from the previous year.

"These figures clearly illustrate

the significant impact of the poultry industry on the Delmarva economy," said DPI President Larry K. Winslow. "Our industry continues to expand and all indications are this trend will continue. Delmarva is the birthplace of the broiler industry and remains a major producing area, accounting for close to 10 percent of America's broiler chickens."
