

S-Tine Basket Harrow Provides Uniform Seedbed

BRILLION, Wis. — Brillion's new CMDB S-tine basket harrow provides a smooth, uniform seedbed for optimum seed/soil contact and maximum germination and growth.

Four rows of S-tine shanks penetrate and shatter the soil up to five inches for a better soil mix and incorporation of chemicals. The 15-inch underframe clearance and the wide, 19-inch spacing between ranks allow residue to flow through the machine for fast, easy tillage.

An independent, coil-tine drag

follows the shanks to break up clods and level the field. The tough, flexible tines provide easy, even trash flow.

A large, 12-inch diameter roller basket crumbles and firms the soil, providing a smooth, flat seedbed. The finer soil is deposited in the planting zone while heavier particles remain on top to reduce air pockets and trap moisture.

"The new S-tine basket harrow is built tough for long wear and quality performance," said Michael Irish, Brillion's national sales manager. "And it's economi-

cally priced compared with other tillage equipment."

The S-tine basket harrow is available as a complete unit, a harrow and drag unit, or a harrow on-

ly to match your field conditions. Three models — 12, 15 and 18-foot units — are available with a three-point hitch.

For more information, contact your local Brillion dealer or write Brillion Iron Works, Inc., Brillion, WI 54110, (414) 756-2121.

Brillion's new CMDB S-tine basket harrow provides a smooth, uniform seedbed for optimum seed/soil contact and maximum germination and growth.

ABS Jerseys Offer Superior Genetics

DEFOREST, Wis. — "ABS has held its position with the best Jersey lineup available," according to Dick Smith, dairy product manager.

"We've held strong with the best sons of Duncan, Yankee, TOP BRASS, ROYAL, and three of the top five bulls in the breed for milk fat protein dollar value (MFP\$). For type, ABS also maintains dominance as LESTER continues his reign as an exceptionally elite type sire," he said.

Leading off the ABS lineup for profitability, 29 J2910 GLENWOOD repeated his debut as the breed's #1 MFP\$ (+242) bull. With PTA's of +1993 and +55P, GLENWOOD's exceptional production combined with his linear type traits yield a PTI equal to +347, improved rear udders, and improved teat placement. GLENWOOD is an exciting cross on Sooner daughters for maximizing

profit.

29 J2877 SKY LINE maintained the title of the breed's number one living protein bull (+65) on his sixth summary and ranks fifth in the USDA's MFP\$ list. SKY LINE sires medium-sized cattle that excel in dairyness. He also improves both fore and rear udder attachments and is an especially nice mating on LESTER daughters. The SKY LINE x LESTER cross should maximize protein. This cross is very complimentary from a type standpoint and it combines two different sire lines — Yankee Chief and Duncan. SKY LINE sons are already playing an important role at ABS.

While 29 J2875 LESTER reigns as the breed's number one type sire, his PTI of +384 also ranks him as a breed leader. LESTER sires strong, powerful, open-ribbed cattle that tend to slope at the rump. They have excellent feet

and legs and exceptional udders, with high, wide rear udders and close front teats. LESTER is the world's leading sire of sons.

As a promising new addition to ABS' Jersey lineup, 29 J2924 MARVIUS debuts in the top 15 bulls of the breed for MFP\$ (+217). A Duncan son from a 91-point TOP BRASS dam, MARVIUS has established a milk proof of +1812.

29 J2865 BROOK, the breed's highest MFP\$ (+225) TOP BRASS son, is an obvious choice to use on Duncan and Sooner breeding. BROOK sires extremely tall cattle with good feet and nice udders. BROOK's increasing PTA's (+1654M, +53P, +2.2T), deserve close attention.
