

Septic System Management, Well Protection Workshop Set

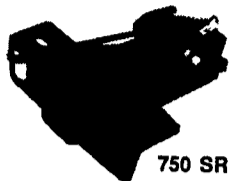

CHAMBERSBURG (Franklin Co.) — On February 20, a Septic System Management and Well Protection Workshop will be held at the Penn State Fruit Research Laboratory in Biglerville from 9 a.m. to noon.

At the workshop, homeowners will learn the steps to take to ensure that their water is safe to drink and that their septic systems are properly maintained. In addition, a program to provide home buyers and sellers with consistent inspection guidelines for septic systems will be covered.

There is a \$4 registration fee. The workshop is being sponsored by the Pennsylvania Septage Management Association and Penn State Cooperative Extension.

For further information or to register, contact Penn State Cooperative Extension, (717) 334-6271 or (717) 624-4525.

THE GOLDEN GATE BRIDGE and BIG DUTCHMAN PROFIT-TIER® CAGE SYSTEMS

HAVE ONE THING IN COMMON

THEY BOTH HAVE INTELLIGENT DESIGN

Our cage support system has been designed and engineered with tested technology. This superior suspension makes the superstructure of the cage row stronger and better aligned from end to end.

This is accomplished with a tie-in between the cage suspension rods, the cages and the stand in each section of cages.

Leg stands are screwed together, not merely clipped together. We feature a cage-to-stand mounting on tabs that are built into the leg stands. In addition, every cage section is attached to the feed trough which

acts as an I-beam providing more rigidity and support. The trough is also attached to the leg stand. The result is superior strength, alignment and stability throughout the system.

All of these features allow us to use a leg stand every 10 feet, significantly reducing building costs.

When you purchase your next cage system, buy the one that was designed and engineered to endure. We offer the important features that make a cage system work better and last longer.
