## Promise/Attainer

# Your Smart Investments In Alfalfa Performance

For maximum feed value from your alfalfa crop, it's hard to beat the performance of Promise and Attainer.

Promise was one of only two alfalfa varieties to produce 6 T/A yields in 1991 Cornell trials. And its two-year average of 8.49 T/A in Penn State trials was tops among 49 varieties.

Attainer is unmatched in milk production per acre, producing 16,200 lbs. of milk/acre in 1992 field trials.

Make a smart alfalfa investment. Talk to your local Hoffman sales representative today or call:

## 1-800-776-7929

## Promise

- Consistent yields above the mean in 1990 and 1991 Cornell and Penn State trials.
- Exceptional persistence even under intense management schedules for maximum forage production.
- High resistance to all alfalfa diseases common to the Northeast.
- Stand durations of 4-5 years to minimize reseeding expenses.

## New Attainer

- Produced 16,200 lbs. of milk/acre in 1992 field trials.
- Unmatched stem quality, plus an increase in leaf-to-stem ratio for greater protein content.
- Larger harvest window than most alfalfas for improved field management.
- High resistance to all alfalfa diseases for better alfalfa stands.
