Accurate & Precise In Reduced-Till Fields, Too.

White 6100 planters have gained a well deserved reputation for planting with incredibly accurate spacing at precisely the right depth.

Our short 18" aerodynamically designed seed drop and independently acting walking beam gauge wheels see to it. And our low pressure, air metering system and edge drop seed disc singulates seeds to avoid doubles or skips.

Best of all, the row splitter

and wide array of attachments allow you to plant in nearly any field condition—no-till, mulch till, or finely worked—with row widths ranging from 15" to 40".

New 6600 Planter two-bar design features interplant row units
