Case IH 1600 Series Axial-Flow Combines

TO HARVEST BETTER, YOU HAVE TO DO THREE THINGS BETTER. THESE COMBINES DO.

CHOOSE THE MODEL SIZED TO YOUR ACREAGE.

- 1620:** A 124-hp unit, with 125-bushel tank, it's an efficient performer for small to moderate acreages.
- 1640:** Rated at 150 hp, carrying a 145-bushel tank, it performs on the upper edge of its mid-sized rating.
- 1660:** Its 180-hp rating and 180-bushel grain tank let it perform with any combine in its size.
- 1680:** At 225 hp, equipped with a 210-bushel grain tank, it's suited to the biggest acreages anywhere.

Your crop is your paycheck. Harvest it better and you get more return on the time, money and hard work invested in it.

Case IH 1600 Series Combines do just that... in the three ways that count most. One, they harvest faster. They've got the horsepower to move them through the field at top speeds. And their big threshing, separating and grain-conveying capacities easily handle high-yielding crops.

Two, they deliver more high-quality grain. The cage's large separating area distributes material more evenly to the sieves, increasing their efficiency. A variable-speed

advanced-design cleaning fan finishes the thorough cleaning process for tops in clean high-quality grain.

Three, they're easier on your crops. With Axial-Flow, the single large rotor threshes your grain, gently...unlike the single, severe threshing action of conventional combines that damages kernels. So gentle, thorough Axial-Flow action means less cracked corn and less dockage at the elevator.

Result: a bigger paycheck.

And there's a Case IH Grain or Corn Head to match any cropping practice.
