

Introducing the:

Shaker Buddy Mixer™

Just What You Were Looking For... Now Available At Binkley & Hurst! SEE AT OUR OPEN HOUSE!

A breakthrough for professional landscapers, greens keepers, nursery owners, home builders — anyone who needs an economical way to mix or separate materials.

Screening just became a one-man job — with the all-new Shaker Buddy Mixer. Tow it at normal highway speeds with a 3/4 ton pickup. Set up in less than two minutes by simply pressing its hydraulic lever. Change screens in less than 10 minutes with a socket wrench. And put it to work: sizing stone, screening loam, mixing soils, separating wood chips, even sizing coal. With the Shaker Buddy Mixer, it's all a one-man operation.

Made in the USA from heavy plate steel, The Shaker Buddy Mixer is designed for rugged, long-lasting performance on any job site. Put the Shaker Buddy to work for you. It screens as effectively as it cuts your costs.

The Shaker Buddy Mixer's unique six-foot loading height accommodates all makes of Skid Loaders and front end loaders with a bucket width of 66 inches or less. With a small Skid Loader, The Shaker Buddy Mixer can process 40 yards of screened loam per hour.

Towable Option

SUPERIORITY — PROVIDES THE QUALITY YOU DEMAND
TAKE A LOOK!

PROFESSIONAL FARMERS ARE BUYING SUNFLOWER TILLAGE FROM BINKLEY & HURST LIKE NEVER BEFORE!
You Too Can Be A Happy User!

SUNFLOWER
FIELD CULTIVATORS
CHECK THIS OUT! SPECIAL PRICES!!!

- * 10" Plain Sweeps
- * 24" Clearance
- * Heavy Duty On-Edge Shanks For Use In Tough Conditions
- * SUPER HEAVY WEIGHT

- * 18'1" to 26'3" Widths In Stock
- * Flat Fold For Narrow Transport 11'11"
- * Walking Beam Tandem Under Main Frame

WHY BUY A SUNFLOWER DISC HARROW?

The Reasons Are Obvious!
 Sizes From 10'-15' And 18'-32' Folding

Check Out The Rest - Then Buy The Best! **SUNFLOWER**

WING GAUGE WHEELS Eliminate Gouging
 BLADES: 1/2 "x22" or 1/2 "x24" On 8.5" Spacing 3 Sided Blade Prevents Erosion By Eliminating A Continuous Furrow
 DOUBLE OFFSET DESIGN Provides Maximum Leveling Without A Middle Buster Or Center Tooth

TRANSPORT WIDTH On Wing Units Up To 24'2" Working Width Is A SAFE 12'4" Transport.

3 YEAR WARRANTY On Triple Lip Sealed Trunnion Mounted, Regreaseable BEARINGS

HEAVIEST AXLE SHAFTS In The Industry - 1 1/2" Dia. Gears Are Hydraulically Torqued To 1400 Lbs. & Spring-Loaded To Eliminate Loosening, Wear And Breakage.

Your Choice Of RIGID or C-FLEX BEARING STANDARDS.

SELF-LEVELING HITCH Maintains Level Setting Regardless Of Desired Depth Or Tillage Application

SUNFLOWER Series 6000 LAND FINISHER

The RIGHT combination in one-pass tillage. The New Sunflower 6000 Series Land Finisher performs three operations in one pass. It discs, cultivates, and finishes the seedbed all at once. Working widths from 13 to 37 feet.

- New extended frame length for better trash clearance
- Auto-reset trip
- Heavy-duty 4"x6"x3/4" mainframe construction.

Hydraulically controlled coulters gangs (optional) can be adjusted on the go or raised completely in clean soils.

Walking tandems to better conform in uneven ground conditions.

COULTER CHISEL

8'9" to 18'9" Widths Available!

CHECK OUT THIS SUPERIOR NEW PRODUCT FROM SUNFLOWER!

"We have been able to meet nearly every residue coverage expectation by use of varying options and attachments on the Sunflower equipment."

We have been representing the Sunflower product line in the Northeastern part of the country in many areas. With the Sunflower products, we have had great success meeting the needs of farmers who are looking for quality, value, and versatility. Sunflower is not a low price line. It is rather a standard in weight, design, features and appearance. Farmers are willing to pay a bit more for these obvious qualities.

With the new and increasingly stringent residue cover requirements, we have been able to meet nearly every residue coverage expectation by use of varying options and attachments on the Sunflower equipment. After years of affiliation with Sunflower, several factors are very clear. One, the best Sunflower equipment are Sunflower owners. Two, with Sunflower's commitment to quality and dealer support, a better value is tough, if not impossible, to come by.

If tillage is managed properly it is less costly than chemical farming and will reduce environmental risk.

Sunflower has manufactured equipment designed specifically for residue management on the Plains for over 35 years. Currently that same theory is being adopted throughout the corn belt in an effort to comply with Government regulations. Many have attempted to comply by eliminating tillage and pouring on the chemicals. This method proves to be costly and results in a reduction of yields over several years. On the contrary, we feel if tillage is managed properly it is less costly

than chemical farming and will reduce environmental risk. We do not advocate tillage practices where precious topsoil is lost. Sunflower builds quality tillage tools that will let you till into compliance. Residue management programs are going to become a big part of our future. As stewards of the land we need to weigh the differences in management practices and remember, tillage promotes a safer environment for tomorrow.

Approaching the Compliance Deadline.

The Government Conservation Compliance Standards go into effect January 1, 1995. This means highly erodible land must meet terrace and waterway requirements and the ability of farmers to properly manage residue will become a requirement too. The American Farmer will face soil management responsibilities never before encountered. A high percentage of the conventional tillage methods will need to be replaced with Mulch Tillage. This method requires tools that incorporate the necessary options,

features and adjustments allowing residue levels to be managed into compliance. To avoid the destruction of expensive terraces during tillage operations it will be necessary for the tools to be flexible too. At Sunflower, our entire line of equipment is designed to work terraces and manage residue. We grew up on the mid Hi-Plains and have always had to manage residue, moisture and soil. Because of this, we back every machine we build with over 35 years experience in residue and soil management.

What are the benefits of conservation disc blades?

As the amount of residue required increases in most farm programs new equipment options are going to be needed to stay in compliance. Sunflower now offers the "conservation" blade for all discs. This lower concavity disc will: 1) reduce the amount of weight needed to penetrate the ground, 2) cover less residue, 3) create less compaction and 4) require less horsepower to pull. All Sunflower discs are available with either standard disc blades or

can be equipped with the conservation blades (both shown at the left). For more information on these blades call us at 1-800-748-8481.

Over 35 years of manufacturing top quality residue managing tillage tools and backing them with a dedicated sales and service organization.

Quality and Service... the standard at Sunflower.

At Sunflower, we have built a loyal following of customers through our quality products and highly qualified service organization. Simply stated, we stand solidly behind every product we build and pride ourselves in the fact that a high percentage of our customers are repeat Sunflower buyers. This level of customer acceptance and satisfaction motivated us to implement our 3-year limited warranty. Every product we build is covered by this program and is an example of the strong level of confidence we have in the line. When a

company has this much faith in their product you can be sure you're buying quality and expertise. All of this quality and expertise is backed by a highly qualified staff of service personnel that you can rely on. We know the importance of quality and service and have dedicated over 45 years in developing the expertise required to produce the best tillage equipment money can buy. Isn't it time you give us a try?
