

MARYLAND DHIA

January, 1993

The January 1993 DHI information for Maryland dairy herds is listed by herd name, county association, total number of cows in the herd, and the average production per cow on a 3.5% Fat Corrected Milk (FCM) basis for all milking cows in the herd. The herd must consist of at least 10 cows averaging 65 lbs. or more of 3.5% FCM per cow per day. All of the herds are on official DHI or DHIR test. Also listed are the top 10 herds in Maryland for the Brown Swiss, Guernseys and Jerseys, and the top eight herds for Ayrshires.
