More than seed...

"The W-L I planted two years ago is giving me better yields and higher protein than any previous crop. I had a public variety in this field last time and I had to take it out in the third year. This W-L alfalfa is sure to go a full four."

For more than 25 years, W-L alfalfas have been bred, tested and produced to give high yields, leafy, fine-stemmed forage with long stand persistence and multiple pest and disease resistance. For the best return on your investment, you can't afford less than W-L.
