

185

NO SPREADER BUILT BETTER

The New Holland Model 185 is built to last.

- Strong, corrosion-resistant steel sides.
- High-density polyethylene (HDPE) floor.
- Lifetime Bonded Protection warranty.

This 287-bushel spreader features oscillating tandem wheels that allow faster ground speeds with less ground compaction. Get fast, smooth unloading at two spreading rates with the standard worm gear drive.

Stop in and see why this is the best-selling spreader in its class.

A LATE SPRING — means less time to spread! A dependable spreader from Ford New Holland helps make sure you get the job done!

Model 200MF Stainless Steel. Finished in-plant and ready to ship.

Get Comforting Heat and Efficiency.

The Mahoning Outdoor Multi-Fuel Furnaces provide thermostat controlled heat by economically burning wood, coal or fuel oil. The furnace is placed 25-100 feet outside the structure to be heated, connections between the furnace and building are buried underground. Wood or coal is the primary burning fuel lasting 8-12 hours in the furnace. For convenient, automatic firing the separate oil burner combustion chamber can provide heat until wood or coal burning is desired. Both Wood/Coal & the Fuel Oil burners are enclosed to heat the same water tank. The purpose of the firebox is to heat the water-filled tank surrounding the outside unit, this heated water is then circulated through underground pipes into your home. A heating coil is installed inside your existing heat system. The thermostat controls the blower which picks the heat off the coils and delivers warm air through existing ducts and registers. There are safeties which eliminate the danger of over-pressurizing the system and automatic shutdown in case of a power failure. The Mahoning Outdoor Furnace can also be connected to an existing hydronic heating system, that operates at 180° F or less, using fin tube baseboard, cast iron radiators or hanging hydronic heaters. Only the thermostat and heating coils are installed inside your home, eliminating open fire dangers, smoke, dust and messy kindling wood boxes. Adjust the thermostat for the Mahoning Outdoor Furnace to your comfort setting and it automatically controls the water pump and blower to circulate heat to your home. You may set the thermostat for your existing heat system to back-up the Mahoning Outdoor Furnace when not in operation or in case the firebox is left to burn out. An Aquastat senses the temperature of the water in the outside unit and automatically adjusts the combustion rate to maintain the correct temperature (normally 180 degrees).

Hot Water too...!

A Mahoning Outdoor Furnace is a heat exchanger. By running a cold water line from your home to the outside unit, fresh household cold water can be heated and returned to the hot water plumbing in the house. A tempering valve adjusts the hot water at the faucets to a range of 120° to 160°. This boiler system will adapt to any existing plumbing. Heat your pool & hot tub with energy generated by a Mahoning Outdoor Furnace!

OUTDOOR FURNACES

Cut Your Heating Costs With Our Outdoor Furnace!
WOOD • COAL WOOD • COAL • OIL
- STANDARD MODEL - - MULTI-FUEL MODEL -

Approved for Natural or LP Gas
Heat Your Home, Farm or Commercial Buildings with Mahoning Outdoor Furnaces

Safe - Efficient - Durable

Look at what makes the Mahoning Outdoor Furnace a great purchase...
CLEAN. All dirt, dust, fuel and fire is outside. No chance of chimney fire or flue fire.
ELIMINATES AIR POLLUTION IN THE HOME. Smoke, fuel odors and other causes of allergies are outside the home.
SAFE FOR MOBILE HOMES. Eliminate a danger that other furnaces contained in a mobile home can cause.

NO DANGER OF EXPLOSION. This is a zero pressure furnace.
ENCLOSED COMPONENTS. The circulation pumps and electrical connections are enclosed in an insulated cabinet on the back of the Mahoning Outdoor Furnace.
ADAPTABLE. Install our furnace in any forced air heating or hot water system.
OUTSIDE SHAKER HANDLES. Coal burning and ash removal made easy.
- CATALYTIC COMBUSTOR -

With the aid of Corning Company, we were able to design a catalytic combustor unit that is proven to provide the following:

- 1) Cut emissions by 90%.
- 2) Improve burning efficiency by 50%.
- 3) Efficiency rating of 83 to 85%.
- 4) Makes furnace more user friendly & neighborhood acceptable.
- 5) No more smoke belching!
- 6) Use 1/3 less wood to heat your home!

Proudly Built in Indiana County Pennsylvania
