## Who makes the most practical tractors? Last vear, more value-minded farmers picked Massey-Ferguson than any other make.

In fact, one of every five tractors now sold in the Western World is an M-F. Which makes Massey-Ferguson the Western World's largest tractor manufacturer.

One of the big reasons for this popularity is the great value of the 50-90 PTO hp line of M-F 300 Series tractors.

They all give you the torque, economy and reliability of world-famous Perkins diesel engines and all the advantages of advanced Ferguson system hydraulics. Plus you get the practical features you want, like hydrostatic steering as standard equipment.

Massey-Ferguson engineers put a lot of time and effort into designing these tractors to save more of your time and effort. They're incredibly easy to operate and maintain. And they have one of the best reliability records of any tractor ever made.

We'd like to show you why an M-F 300 Series tractor can be the best value for your hard-earned investment.

Practical choices.						
MODEL	M-F 362	M-F 375	M-F 383	М-F <b>390</b>	М-F 390Т	м-F 399
HP+	55	60	73	70	80	95

Manufacturer's raised PTO horsepower. All medels available with 2 or 4-wheel drive.
Some can be equipped for Wide Rew Crop or Lew Profile appliactions.

THE <b>L</b>	4 <b>45</b> H	LARVESTER
EXAMPLE EXAMPLE March	AREMA	<b>MAXIMUM FEED QUALITY</b> To ensure maximum feed quality from maize it is vital to crack every kernel. Digestion of uncracked maize falls as the maize becomes drier independent trials have shown the Claas corn cracker to be close to too of effective From the cylinder the corn passes through the two large diameter rollers with saw tooth profiles. The rollers run at different speeds to intensify the grinding effect and open up each kernel. It is a fairly tough process so the latest generation of corn crackers take account of the wear involved on the rollers. Nothing can reduce the wear but Claas have cut the cost of repair by making the outer sleeve replaceable. The shaft, drive pulley and bearings can all be reused which cuts down repair bills dramatically Adjusting the distance between the two rollers is accomplished by turning two handles, easily accessible behind the cab. In no time at all the degree of cracking can be matched to the ripeness of the crop
	RELIABILIT	TY STATE

# ILITY The CLAAS Cutterbox is a unique

balanced design using 2 knives in a V configuration. This forces the cut-ting action toward the center instead of the outside. This is the secret of their horsepower requirement and good quality of cut.

Efficient preparation system for all types of crops
