EGG SALAD WEEK

THE BIG WIND

These blustery days are a welcome sign of spring. However, the wind becomes a damaging force at about 39 miles per hour. According to Beaufort's Scale of Wind Speeds (used by the National Weather Service) any wind of more than 75 mph is a hurricane. Although extreme wind speeds in tornadoes and hurricanes have never been fully measured, they have been estimated at around 200 mph. One spring day, the wind broke its own record. On April 12, 1934, a gust of wind on Mount Washington in New Hampshire, was measured at 231 mph. It was "the strongest natural wind ever recorded on the earth's surface." Not a good day to fly a kite!

Many can brook the weather that love not the wind. — Shakespeare

TIP OF THE WEEK

A paste of vinegar and baking soda will often remove "ring around the collar."

EARTHWISE

Specialized cleaning problems don't always require specialized products. You can make your own anti-mildew and disinfectant scouring powder. Combine 1/4 cup baking soda and 1/4 cup borax. Wet the affected area, sprinkle on the powder, and scrub with a damp sponge. If the area is very dirty, allow the powder to stand for several hours before rinsing. This cleanser is inexpensive and nontoxic, is safe for fiberglass, and deodorizes too!

SALMON STUFFED EGGS

- 8 hard-boiled eggs
- 1 teaspoon dry mustard
- 1 teaspoon vinegar
- 4 tablespoons mayonnaise
- 2 ounces smoked salmon, chopped
- salt and pepper to taste
- paprika for garnish

Slice eggs in half lengthwise. Remove yolks into a bowl and mash with a fork. Mix dry mustard and vinegar to form a paste, then add to yolks with mayonnaise, salt, and pepper. Stir in chopped salmon and gently mound into egg whites. Sprinkle with paprika.

Makes 16 halves
