The VacuMeter™ is light-years ahead of the Finger Pickup and competitive meters in versatility, accuracy and speed

Improve corn seed spacing up to 17 percent. Seed corn shapes and sizes have changed dramatically. To maintain seeding accuracy, you need a seed meter that can meet today's demanding seed challenges. You need the VacuMeter system, offering up to a 17 percent increase in corn metering accuracy over the finger pickup system.

New single-cross varieties of seed vary in shape and size. Because the VacuMeter system uses gentle vacuum pressure to hold seeds in place, it handles all sizes of seed accurately. And VacuMeter accuracy may enable you to reduce planting rates to save on seed costs.

HC TRAILER SPRAYERS

With the increased popularity of no-till crops and more use of post-emergence herbicides, the High Clearance sprayers find their way through more and more fields. The tall single wheels (11 2 or 13 6x38) offer a smooth ride even under rough field conditions, they turn easier and shorter at the end of rows reducing crop damage and soil compaction. The high under-axle clearance allows vegetable growers to enter their crops for late insecticide and fungicide applications

Available In 500, 650, 800, 950 & 1000 Gallon Tank Sizes
