WARNING, ALL SILO OWNERS

It's important that you know your silo needs maintenance. Your silo will not fall when its empty. Please check your silo for damage or check your insurance policy!

A Reminder: If you plan to repair your silo prepare to empty it earlier so we can schedule to work you in.

RESURFACES INTERIORS:

- Coats the silo's interior
- Protects feed in storage
- Durable, tough, acid-resistant
- Increases useful life
- Economical

Before The silo's interior with plaster damaged and stave exposed

After The surface is reconditioned, and a new, thick, tough surface will protect stored feed

ShotCrete is also good for repairing stone walls.

ORDER YOUR NEW SILO WITH A FIBERDOME CHUTE OR REPLACE YOUR OLD WORN OUT CHUTE

Fiberdome SILO CHUTE

made with fiberglass, the material of the future — and proven in the past —

The Fiberdome chute is designed and engineered to be installed on most types of silos. Its structure allows it to withstand the toughest beating the weather elements or silo unloading systems can possibly dish out.

The chute is constructed in full 7 1/2' sections to minimize the number of joints. Connecting joints have a 2 1/2" tongue and groove design to keep feed in and water out. The large ribbed construction adds stability and strength.

Fiberglass is durable, corrosion-proof, attractive and translucent, allowing sunlight to pass through. Sunlight quickly dries interior moisture in the chute. The hard gleaming gelcote surface will remain for many years.
