Here are the facts why ULTRAFLO outperforms chain feeders

NOW! New ULTRAFLO II through design means even more feed savings over chain feeders

FEED SAVINGS. Customers report 1/2 to 2 lbs per 100 birds/day,—over $10,000 per year saved on a 100,000-bird house. Year after year!

TROUGH DESIGN. High tensile steel for strength. No feed buildup or waste like chain trough.

NO HI-GRADING if feed due to our design than lets birds pick over feed while feeder runs.

REMIXES FEED. Our auger slowly revolves, keeping old and new feed blended. Chain doesn't so feed can get stale.

REPAIR & MAINTENANCE. Ours needs the least of all feeders. Easy splicing with auger connector, and no troublesome corners or chain guides to replace. Saves money and time year after year.

SIMPLE OPERATION. "Push-Pull" Power Units with low HP motor are located along the feeder line as needed.

EASY AUGER CONNEC-TOR. Allows fast and simple installation, also quick and easy repair of auger if ever necessary.
