MYTH NO.3

"Variable chamber balers have less spoilage."

FACT: No other round baler on the market can match the low spoilage rates of a Claas fixed chamber baler. That means, on a 50 acre field, you would average 13 tons more spoilage with competitive variable chamber balers.

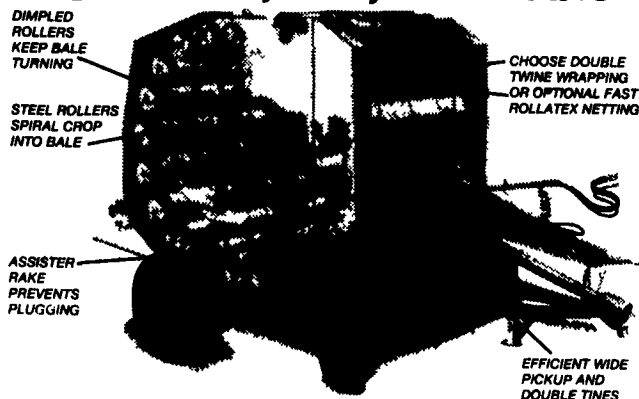

Fact is, the more edible volume per bale, the less bales fed per animal. And that means more efficient feeding.

See your Claas dealer for all of the facts before you base your baler purchase on fiction.

Owners say:

"Tight bales, fast, no trouble"
