RUFF-TUFF POLY SILO LINERS
 for Upright Silos

Now With New Expansion Ring For Easy Installation

If Your Silo Needs New Life... Try Our Poly Silo Liners

- THE ADVANTAGE OF A POLY LINER -
- Spoilage is reduced around doors.
- Feed is exposed to less oxygen - better fermentation.
- Allows storage of high moisture grains or dry grains in a conventional silo.
- Delays repair or replacement of corroded silos.
- Prevents corrosive acids from contacting silo wall - extends silo life.
- Quick installation.
- Effectively seals silos from air and weather.

The Liners Are Manufactured To Fit Most Standard Diameter Silos.

BADGER'S AGRI SERVICE, INC.

It's That Time Again, And We Are Here To Help You Get Your Harvestore® Ready For First Cutting With Quality Parts For Your Unloader

From **Stahl Mfg., Inc.**

AND
Lancaster Level-Flow Goosenecks To End Your Plugging Problems.

You can blow in as much as three tons of haylage a minute - over 100 feet up - with a new 12" center-fill Gooseneck from Lancaster Level-Flo. High profile and 33% larger diameter reduce friction to make plugging a thing of the past. And the Lancaster Level-Flo 12" gooseneck. Is fully enclosed to make sure your silage and haylage go into your silo - not on the roof.

SPECIALLY MADE FOR HARVESTORES®

WARNING, ALL SILO OWNERS
 It's important that you know your silo needs maintenance. Your silo will not fall when its empty. Please check your silo for damage or check your insurance policy!

A Reminder: If you plan to repair your silo prepare to empty it earlier so we can schedule to work you in.

RESURFACES INTERIORS:

- Coats the silo's interior
- Protects feed in storage
- Durable, tough, acid-resistant
- Increases useful life
- Economical

Before... The silo's interior with plaster damaged and stave exposed

After... The surface is reconitioned, and a new, thick, tough surface will protect stored feed.

ShotCrete is also good for repairing stone walls.

ORDER YOUR NEW SILO WITH A FIBERDOME CHUTE OR REPLACE YOUR OLD WORN OUT CHUTE

Fiberdome SILO CHUTE
 made with fiberglass, the material of the future — and proven in the past —

The Fiberdome chute is designed and engineered to be installed on most types of silos. Its structure allows it to withstand the toughest beating the weather elements or silo unloading systems can possibly dish out

The chute is constructed in full 7' sections to minimize the number of joints. Connecting joints have a 2 1/2" tongue and groove design to keep feed in and water out. The large ribbed construction adds stability and strength.

Fiberglass is durable, corrosion-proof, attractive and translucent, allowing sunlight to pass through. Sunlight quickly dries interior moisture in the chute. The hard gleaming gelcote surface will remain for many years.
