Here are the facts why ULTRAFLO® outperforms chain feeders

FEED SAVINGS. Customers report 1/2 to 2 lbs. per 100 birds/day—over \$10,000 per year saved on a 100,000-bird house. Year after year!

TROUGH DESIGN. High welds and for strength. No feed buildup or waste like chain trough

NO RE-GRADING of feed due to our design. Chain links pick over feed while feeder runs

REPAIR & MAINTENANCE. Ours needs the least of all feeders. Easy splicing with auger connector and no troublesome corners or chain guides to replace. Saves money and three year after year

SIMPLE OPERATION. "Push-Pull" Power Units with low HP motor are located along the feeder line as needed.

EASY AUGER CONNECTION. Allows fast and simple installation, also quick and easy repair of auger if ever necessary.
