Self propelled forage harvesters for highest capacities and universal operation

CLAAS JAGUAR self propelled forage harvesters are professional machines. Profitability demands high working quality and high speed of operation. This can be achieved with advanced technology and fully matured machinery. Today's farmers and contractors make competent decisions. These professionals have made the CLAAS JAGUAR Europe's number one.

Owners say:

"Tight bales, fast, no trouble"

DIMPLED ROLLERS KEEP BALE TURNING
STEEL ROLLERS SPIRAL CROP INTO BALE
ASSISTER RAKE PREVENTS PLUGGING
EFFICIENT WIDE PICKUP AND DOUBLE TINES
CHOOSE DOUBLE TWINE WRAPPING OR OPTIONAL FAST ROLLATEX NETTING

DEMONSTRATIONS: Claas, Rollant Baler, Claas Quadrant Big Square Baler, Kverneland Wrapper

SEMINAR: Reps from Germany will be on hand to discuss and demonstrate silage & haylage practices in Europe.

New Vicon GMR Mower Conditioners are even better than before. For high capacity performance, nothing else can make this cut.

Now, with introduction of new GMR series, field performance has reached new levels of efficiency, with more strength, more stability and even better cutting and conditioning than before.

Vicon engineers listened • Mainframes are stronger, with less weight. Completely redesigned with a lower profile and welded side panels to deliver the endurance and stability you

need to keep harvesting on schedule.

• New FLAT, STRAIGHT cutterbars have improved

bearings and single, one piece skids to protect the full cutterbar length.

• Conditioning rolls are set in low behind the cutterbar at a 25 degree angle to streamline crop flow, leaving high, fluffy swaths for fast curing and drying. A new V-belt drive protects the rollers against blockage.

• Noise levels have been drastically reduced with a redesigned front gearbox and mounting for quieter operation. You can still cut square corners on the move with the new full swivel ball hitch engineered for maximum maneuverability. Plus there's a new computer designed mechanical suspension system that smooths the ride in the roughest conditions. These machines are simple to operate with an advanced 3-bladed disc cutting and conditioning system that turns acres into miles of curing, nutrient-rich hay.

Choose from three reliable models with working widths of 7'8", 9'2" and 10'6".

THE BEST OF BOTH WORLDS!

CLAAS

MASSEY FERGUSON and CLAAS teamwork means:
- The best ideas and technology from all over the world.
- The manufacturing might of the world's largest combine manufacturer.
- The sales and service support that makes MF the world's best selling brand of tractors.
- And the long-term commitment of two world-class companies.

MASSEY FERGUSON and CLAAS enjoy a richer heritage of accomplishments and successes than any other farm equipment company.

For nearly thirty years, more farmers, worldwide, have chosen MF tractors that any other brand by a wide margin. The reasons for this immense popularity start with outstanding products, of course. But they also include outstanding product service and support.

The MASSEY FERGUSON organization also understands the unique needs of North America farmers. Regional MF Business Units put product and marketing decisions closer to its customers, and make MASSEY FERGUSON more responsive to customers' needs.

Across the ocean in Germany, CLAAS is the world's undisputed leader in the design and production of combines and other harvesting equipment. Its manufacturing plants are modern and efficient, incorporating the latest in technology. Its labor force is well organized and highly skilled. As a result, CLAAS products are setting new standards for consistent quality control and reliability.

MASSEY FERGUSON developed the world's very first, commercially available, self-propelled combine in 1938.

Since then it has built more than 150,000 combines for U.S. and Canadian farmers. This makes MF a leading combine producer in North America.

During this time MASSEY FERGUSON has earned the respect and preference of the most demanding users. The widely popular MF 800 Series combines, for example, are still in high demand and command top dollar on the used combine market.

CLAAS of Germany, meanwhile, is the undisputed combine leader in Europe and many other parts of the world. It has produced more than 350,000 combines for use all over the world.

As a result, CLAAS combines have been perfected to harvest an amazing range of crops under the most severe conditions imaginable. This global diversity has resulted in combines that are unsurpassed for threshing ability and reliability.

Thanks to truly global operations, CLAAS is able to gather practical field experience twelve months a year. This dramatically shortens the time it takes to bring a first concept through to finished new product.
