

# Lowell Receives Fellowship

## FAIR DAYS

**Kempton Country Fair**  
Momentum is gaining at the Kempton Community Center where plans are being completed for the 39th annual Kempton Country Fair to be held Friday through Sunday, June 18 to 20.

With two modified stock classes added to the Friday night tractor and stock pick-up pulls and a children's pedal tractor pull scheduled for Sunday, something new has been added to this year's roster. This season marks 30 years of tractor pulls at the fair.

The generous gift of scholarship funds has added to the number of contestants vying for the title of *Es Lieblichst Maedel*, the fairest one, who will reign as Miss Kempton Fair for 1993. The competition will be narrowed prior to

the fair weekend; however, as in the past, the queen will be selected in a series of events including talent, evening costume and an on-stage interview.

The schedule has been posted for most events, volunteers are being garnered, the musical talent has been signed, other events including exhibition booths and stands are under way, and the fair will go on rain or shine the entire Father's Day weekend.

Admission for 1993 is \$3 per person which includes controlled parking. Children under 12 are admitted free.

For more information for any of the events, call or write the Kempton Community Center, Box 42, Kempton, PA 19529, (215) 756-6030.

COLLEGE PARK, Md. — William K. Griffith of Great Falls, Va., second from right, presents J. Fielding Reed Fellowship Award and \$2,000 check on behalf of the Potash and Phosphate Institute to Karen A. Lowell of Lancaster, Pa.

Lowell is a graduate student in agronomy at the University of Maryland at College Park. She is one of five soil fertility graduate students throughout the nation selected for this year's honor and the first from the University of Maryland since the award was established in 1980.

A former Peace Corps volunteer in Sierra Leone, West Africa, Lowell is interested in finding ways to improve the quality and usability of poor soils in Africa. Looking on are Raymond R. Weil, left, of Hyattsville (Prince George's County), professor of agronomy at the University of Maryland, and Richard A. Weismiller, right, of Fairland (Montgomery County), acting agronomy department chairperson.

### Farmers Should Check Conservation Needs

LIONVILLE (Chester Co.) — "Producers who have serious soil erosion, water quality, or pollution problems on their land may want to review the list of Agricultural Conservation Program (ACP) practices available at our office," said Hollis D. Baker, county executive director of the Chester/Delaware County Agricultural Stabilization and Conservation Service (ASCS).

Baker said ACP funds are available to solve these and other conservation problems through annual and long-term conservation agreements.

With winter practices completed, producers may want to begin spring practices or consider applying necessary conservation practices during the coming season, said the ASCS official. Producers must apply prior to beginning the work.

Cost-share funds are available for practices such as waterways, diversions, terraces, stripcropping, no-till and minimum till, and others.

The program offers financial and technical assistance to help producers solve critical soil, water, and pollution problems on their land.
