Exhibit Space Available At Expo

UNIVERSITY PARK (Centre Co.) — Requests for exhibit space at the 1993 Animal Housing Expo still are being accepted. The event, conducted by Penn State Cooperative Extension in cooperation with agribusiness, will be held July 13-14 at the Lebanon Fairgrounds in Lebanon County.

The expo is designed to teach people to learn more about building and remodeling farm structures and about the proper housing and handling of poultry, livestock, and dairy animals. More than 1,400 people attended last year's event.

The expo also gives agribusinesses an opportunity to display a variety of products and services. This year, the expo seeks exhibits that address dairy, livestock, and poultry housing concerns, including building designs and materials, healthy and comfortable ani-

mal environments, materials, storage, animal handling equipment, and labor efficiency.

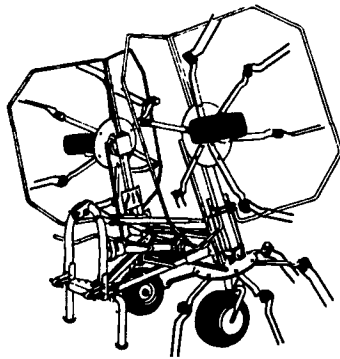

Businesses and individuals interested in exhibiting should contact general chair Dan McFarland, associate extension agent in York County, at Penn State

Cooperative Extension, 112 Pleasant Acres Road, York, PA 17402-9041, (717) 757-9657.

In addition to exhibits, the expo features internationally and nationally known experts as well as local authorities who will speak, conduct demonstrations,

and answer questions on a variety of topics related to animal handling and housing concerns. Among the featured speakers are Dr. Temple Grandin and Michael Gamroth.

FELLA-WERKE GMBH

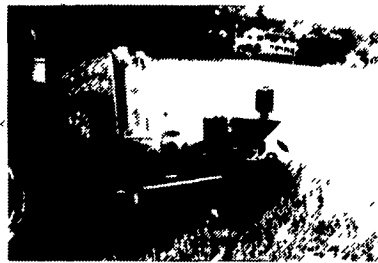

FELLA TRAIL TYPE TEDDERS

TH440 14',5"
TH520 17',8"

FELLA TS631 20' 8" RAKE TRAIL TYPE

NORSE
AUTO-WRAP 600

- ★ Linkage mounted and suitable for any tractor of 45 H.P. or more
- ★ Weight 1,200 lbs.
- ★ Powered by the tractor's own hydraulics, and operated by the levers mounted on the tractor.
- ★ Required hydraulics: Minimum 4 G.P.M.
- ★ No electrical supply needed.
- ★ Wraps bales up to 5'x5'
- ★ Max. bale weight 2,500 lbs.
- ★ Capacity approx. 25 bales per hour.
- ★ Manufactured in Norway by Tellefsdal a.s. manufacturer of balewrappers for the world-market since 1986.

The Combi Rake of the future

Combining 10' Rake/
14' Tedders

- ★ With all working functions: tedding and raking.
- ★ For the tedding operations the rake arms are locked and the machine is tilted forwards, thus obtaining uniform spreading of the material.
- ★ During the raking function the rake tines are controlled in a cam track allowing the rake tines to be tilted upwards. This ensures very gentle treatment of the material.
- ★ Wide flotation tires ensure stable operation.
