## Dairy Learning Attraction At Zoo

KANSAS CITY, Mo. — In a ceremony held recently at the Kansas City Zoo, Terry Blanks, president of Alfa Laval Agri, announced a major donation of a "dairy learning attraction" to the zoo.

The donation was accepted by Dr. Mark Wourms, director of the Kansas City Zoo, who tried his hand at milking a real cow to underscore the importance of this donation.

Alfa Laval Agri, headquartered in Kansas City, has donated the dairy learning attraction as part of a planned domesticated animals area for zoo visitors to see and use. The donation consists of a

lifelike mechanical cow named Della (named for Alfa Laval Agri's "De Laval" products) made of fiberglass, and a working milking machine. Della is see-through on one side where milk production can be viewed. Visitors to the zoo can actually attach modern Alfa Laval Agri milking equipment to her themselves.

"We are thrilled to make this donation to the Kansas City Zoo," said Blanks. "We feel the importance of the dairy industry will be underscored with this donation. We would like for children to fully understand the process behind the production of a food that is so essential to their lives . . . in doing so we build loyal consumers of dairy products for today and tomorrow."

"We are pleased to have such a unique addition to the Zoo," said Wourms. "Della will be a highlight in our domesticated animals attraction. Donations such as this are an essential part of the future Kansas City Zoo."

The donation was announced during Alfa Laval Agri's 10th National Dealer Convention held recently.

### PIG SAVER "DUTCH CRATE"

Dutch Farrowing Crate is another product developed through testing in our research farms. The goal was to develop a crate that nearly eliminates crushing, due to lay ons, unmatched durability and be easy to work around. All this has been achieved by a unique gravity fliprail that forces sows to lie down slowly and using stainless steel for rear doors and legs, proven horizontal and solid steel rod construction. All this at a reasonable cost. Crate also can be installed on an angle.

### CONFINEMENT STALL

are easy to reach over with no sharp edges. Stainless steel rear legs and front feet along with solid steel horizontal rods through punched uprights provide the strongest, most durable stall ever produced by Tri-County (available in 21"-24" O.C. x86").
